Program Overview

Excellence in Attitudes is a grace that one gives to the self; a grace that creates a clearing for Creation of Future that surpasses what was previously just a dream. Just being good, knowledgeable or even competent will not result in our growth. Real growth begins when we make a commitment to excellence that defies old paradigms and charts a new course based on a new and compelling future.

Excellence in Attitudes is an investment into development of relevant attitudes for personal and professional growth. This program will enable participants perceive the environment and themselves with emotional optimism and pursue higher standards of performance.

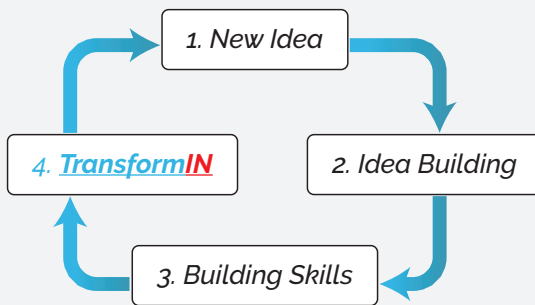

The workshop will help you experience the power of behavioral programs and set pace for making a career in the field of learning and development.

Who will benefit from the Excellence in Attitudes training?

- This is an open workshop designed specially for soft-skills trainers and managers to learn the skills for their personal and professional development.
- They will experience paradigm shift in their being to enhance peace, progress, health, happiness and relationships at home and at work.
